SUMMARY

Aspiring Data Analyst and Computer Science Student at Mansoura University with a dedicated focus on data strategy, analytics solutions, and business intelligence. Proficient in leveraging Python, SQL, and advanced visualization tools to design insight-driven analytics and scalable data workflows. Adept at transforming complex datasets into strategic insights and aligning technical solutions with organizational objectives. Recognized for a strong analytical mindset, a commitment to data-informed decision-making, and a passion for fostering data literacy. Seeking a Junior Data Analyst position to apply technical expertise, architect end-to-end analytical solutions, and contribute to the growth of a data-centric organization.

EDUCATION

Bachelor's degree in computer and information science

2024 – Present

Mansoura university, Egypt

Egypt

SKILLS

Technical Skills

- **Data Analytics & BI Development:** Proficient in data querying and database management using **PostgreSQL**. Expertise in data transformation, advanced modelling, and reporting using **Power Query**, **Power Pivot**, and **Pivot Tables**. Skilled in using **Python** for data manipulation and statistical analysis.
- **Computer Science Foundations:** Strong theoretical and practical foundation in core CS concepts, including **Operating Systems (OS)**, **Data Structures (DS)**, and **Algorithms**. Expert in applying **Object-Oriented Programming (OOP)** principles to write clean, efficient, and modular code.
- **Programming Proficiency:** Solid grasp of programming logic and syntax across multiple languages, including **Python**, **C#**, and **Assembly**, with a focus on building a strong technical base in software architecture and low-level computing.

Technical Problem Solving: Capable of analysing complex technical requirements and implementing optimized algorithmic solutions to improve performance and data accuracy

Personal Skills

- Excellent communication and teamwork skills
- Creative problem-solving and adaptability
- Effective time management and attention to detail
- Motivated, collaborative, and dedicated to active learning

Languages

- **English** Professional Working Proficiency
- **Arabic** Native Proficiency

COURSES

Python Programming Specialization

Jun 2025

National Telecommunication Institute (NTI)

Operation System Basics

Mar 2025

Cisco Networking Academy program

TEACHING EXPERIENCE

Python Learning Journey: From Basics to OOP

- Created an open-source educational repository: "Python Learning Journey," providing a step-by-step guide for beginners.
- Organized learning modules into "Basics" and "OOP," ensuring a smooth transition for students from logic building to software design.
- Actively shared technical knowledge through clear documentation and practical coding exercises

PROJECTS

• **Countries of the World Analysis**

Developed an Excel-based analytics solution, utilizing Python for web scraping and Power Query for data cleansing, to visualize global demographic and geographic data. This approach provides actionable insights into population trends and urban density.

• **Superstore 2019 Business Intelligence Analysis**

Transformed raw sales data into a professional BI dashboard using Power Pivot and DAX. This dashboard tracks branch performance against financial targets, optimizes product categories, and analyses the impact of discounts on profitability.

• **Energy Consumption Analysis Dashboard**

Created a comprehensive energy consumption dashboard to monitor and analyze usage patterns across different sectors, aiding in energy efficiency strategies.
